The extension comes as a part of Social Media Bundle: <http://ecommerce.aheadworks.com/magento-extensions/social-media-bundle.html> and is not distributed independently.

Installation

Installing Pin Button extension

1. Backup your web directory and store database.

▼ [Click to view details](#)

You can make backup copies with any tool you find appropriate

If you are going to use the native Magento backup function, navigate to System -> Tools -> Backups and perform System and Database backups

2. Log in to the Magento backend

3. Disable compilation

▼ [Click to view details](#)

Navigate to System -> Tools -> Compilation.

If Compiler status is Disabled, you can skip to the next step

If Compiler is enabled, disable it.

IMPORTANT: after the extension is installed, you can enable the compilation again; **IT IS CRUCIAL** that you use "Run Compilation Process" function, not just "Enable button"

Installing an extension with the Compilation enabled will result in store downtime.

4. Flush store cache

Click to view details

You can flush the store cache in 2 ways:

- via the backend:

Navigate to System -> Cache Management menu, and click Flush Magento Cache button

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml)	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML	BLOCK_HTML	ENABLED

- via filesystem:

On your server, navigate to Magento root folder, then proceed to /var/cache/; delete all the content there.

5. Download the extension package from your account and extract the downloaded archive

6. Copy the content of /Step_1/ folder to your store's root directory

7. Copy the content of /Step_2/ folder to your store's root directory

8. Flush store cache again; log out from the backend and log in again.

Configuration

All the extension configuration options can be found under System > Configuration > AheadWorks extensions > Pin It Button.

Pin Button extension does not require registering an application on the Pinterest side. Once installed and configured the extension is fully functional.

General Options

- Enable Extension - allows enabling/disabling the extension;
- Width - defines the size of the Pin It button;

How does Pin It button look like?

Furniture Electronics Apparel

Home / Furniture / Bedroom / Akio Dresser

Pin it

Akio Dresser
[Email to a Friend](#)
★★★★☆ 3 Review(s) | [Add Yo](#)
Availability: In stock
\$399.99
Qty: [Add to Cart](#) OR

- Use Short Description of the product - defines if the "pinned" product's short description should be included in the pin;
- Use Price of the product - defines if the "pinned" product's price should be included in

the pin;

- Use Custom Description - allows defining custom description to be included into the pin (Custom Description allows use of the product attributes and is product-wide);
- Pin Count - allows enabling and defining the look of the pin count block:
 - Horizontal;
 - Vertical;
 - No Count.

General Options		
Enable Extension	<input type="text" value="Yes"/>	[STORE VIEW]
Width	<input type="text" value="300"/> <small>▲ The width of the image on http://pinterest.com</small>	[STORE VIEW]
Use Short Description of the product	<input type="text" value="No"/>	[STORE VIEW]
Use Price of the product	<input type="text" value="No"/> <small>▲ Only for simple products.</small>	[STORE VIEW]
Use Custom Description	<input type="text"/> <small>▲ Ex: "attribute_name1" some text "attribute_name2". If "Use Custom Description" field is not empty, then fields "Use Price of the product" and "Use Short Description of the product" will not be considered.</small>	[STORE VIEW]
Pin Count	<input type="text" value="Horizontal"/>	[STORE VIEW]

Content Options

- Display on products page - defines if the Pin It button should be displayed at the product pages;
- Display Custom Buttons - allows disabling/enabling all custom buttons placed via [CMS > Widget](#);
- Display Widget Buttons - allows disabling/enabling ALL Pin Button related buttons.

Content Options		
Display on products page	<input type="text" value="Yes"/>	[STORE VIEW]
Display Custom Buttons	<input type="text" value="No"/>	[STORE VIEW]
Display Widget Buttons	<input type="text" value="No"/>	[STORE VIEW]

Custom positions

Pin Button extension allows placing it's buttons and blocks using widget Layout Updates or CMS pages widgets.

The extension comes with the PinIt widget.

Layout Update

Custom Pinterest button widgets can be introduced to different store pages from [CMS > Widget](#) section.

1. Click Add New Widget Instance;
2. Select PinIt widget in the Type dropdown list;
3. Specify required Theme you want the widget to be displayed at;
4. Click Continue button;
5. Set required widget parameters in the Frontend Properties section;
6. In the Layout Updates section by clicking Add Layout Update button specify the store pages you want the widget to be displayed at.

Once the widget is saved it will be displayed at the set store pages.

Layout Updates			Add Layout Update
Display On *	<input type="text" value="Specified Page"/>		Remove Layout Update
Page *	Block Reference *	Template	
<input type="text" value="Shopping Cart"/>	<input type="text" value="Navigation Bar"/>	<input type="text" value="Default Template"/>	

CMS Pages

Pin Button widgets can be inserted in the CMS pages from [CMS > Pages > Manage Content](#) section.

1. Select existing or create new CMS page;

2. In the Content block click Insert Widget button of the WYSIWYG editor;
3. Select PinIt widget.

The widget will be automatically inserted in the CMS page.

Uninstallation

1. Disable compilation, in case it is enabled.
2. Login to your FTP, navigate to `app/etc/modules/`
3. Open the files `AW_Pinit.xml` and change the following line:

```
<active>true</active>
```

to

```
<active>false</active>
```

Now your Magento is unaware of the existence of the extension

4. Clear the cache under `var/cache`
5. Make sure that the site is working properly, otherwise roll back the changes and apply to our [technical support](#).
6. If everything works fine, it is safe to delete the files of the extension.

Troubleshooting

After the extension installation the store gives an error, or blank page, or suggests to start Magento installation procedure.

Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the store cache and try again.

There is no `aheadWorks` extensions under my configuration section, or having the extension tab clicked I get a blank page, or Access Denied error.

Clear the store cache, browser cookies, logout and login again.

I've set up everything correctly, inserted the HTML code but there is nothing on that page.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.

My configuration changes do not appear on the store.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.
