## Installing Instagram Pro Widget

1. Install the library using the following console command:  
`composer require raiym/instagram-php-scraper.`

2. Unpack the zip file provided in the root folder of your Magento 2 installation.

3. From the command prompt, run the following:

```
bin/magento module:enable Neklo_Core  
bin/magento module:enable Neklo_Instagrampro  
bin/magento setup:upgrade  
bin/magento setup:static-content:deploy
```

---

## Introducing Instagram Pro Widget

The Magento 2 Instagram Pro Widget is an advanced and extremely popular extension that ensures a smooth and authorization-free integration with Instagram. The extension adds an Instagram feed to an online store with the latest Instagram posts.

## Extension Logic

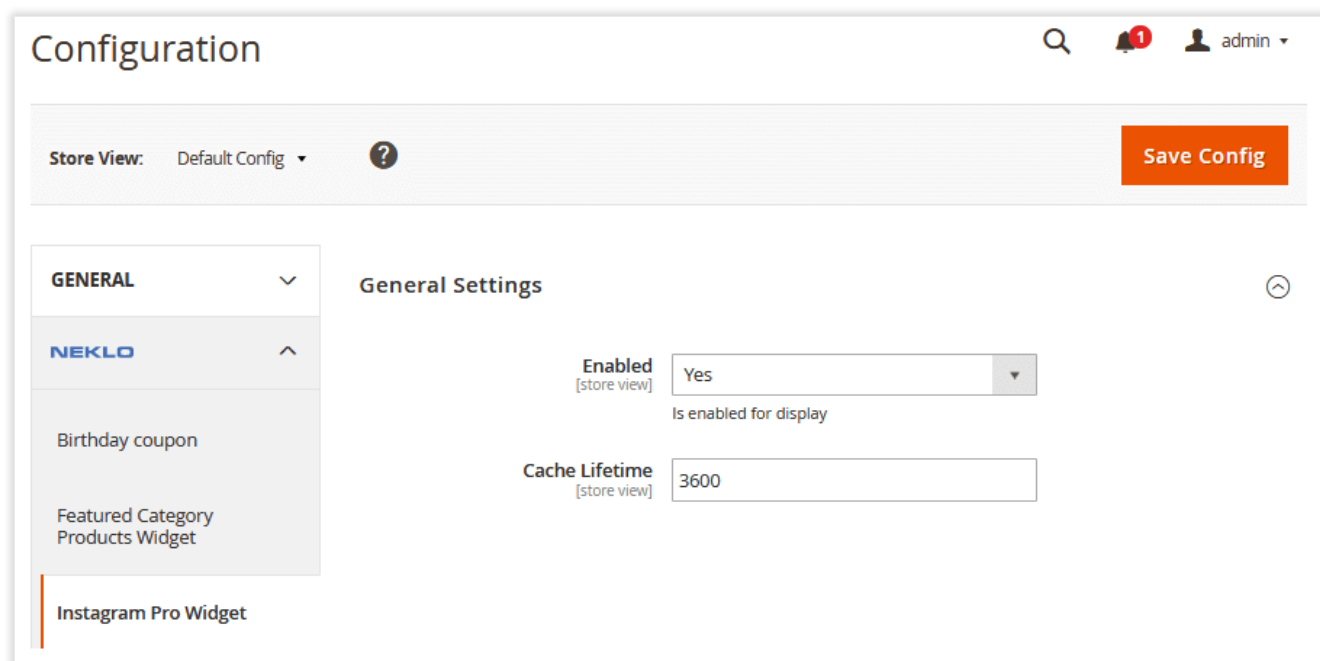

The widget works in two modes: a grid and a slider. Flexible settings provide a number of options to choose from to make your store look even better with the Instagram Pro widget.

The extension gives you an opportunity to show any Instagram photos in your store, no matter whether they are yours or come from an account of a third party. Display photos by a hashtag, user ID, product hashtag, or a category hashtag. With Instagram Pro Widget, the integration with Instagram is now fast and easy.

## Backend Configuration

### Extension Settings

To get started with Instagram Pro Widget, log in to your Magento Admin Panel and go to Stores > Settings > Configuration > NEKLO > Instagram Pro Widget > General Settings.

The screenshot shows the 'Configuration' page in the Magento Admin Panel. The page title is 'Configuration'. In the top right corner, there is a search icon, a notification bell with a red '1', and a user profile icon labeled 'admin'. Below the title bar, there is a 'Store View' dropdown menu set to 'Default Config' and a 'Save Config' button. The main content area is titled 'General Settings'. On the left, there is a sidebar menu with categories: 'GENERAL', 'NEKLO', 'Birthday coupon', 'Featured Category Products Widget', and 'Instagram Pro Widget'. The 'Instagram Pro Widget' category is selected. In the main settings area, there are two fields: 'Enabled [store view]' with a dropdown menu set to 'Yes' and the label 'Is enabled for display', and 'Cache Lifetime [store view]' with a text input field containing the value '3600'.

In the 'General Settings' section, first, enable the widget for your store.

In the 'Cache Lifetime' field, define how long you want your Instagram posts to be saved in your cache memory.

### Setting up the Instagram Pro Widget

To set up the widget, go to Content > Elements > Widgets and click

**Add Widget**

[Account Activity](#) | [Report an Issue](#)

Select the Type = '[Neklo] Instagram PRO Widget' and the Design Theme you use.

The screenshot shows the 'Widgets' configuration interface in the Magento Admin. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main header includes a search icon, a notification bell with a red '1', and the user name 'admin'. Below the header are buttons for 'Back', 'Reset', 'Save and Continue Edit', and a red 'Save' button.

The 'WIDGET' section on the left contains two tabs: 'Storefront Properties' (which is active) and 'Widget Options'. The 'Storefront Properties' section includes the following fields:

- Type:** [NEKLO] Instagram PRO Widget
- Design Package/Theme:** Magento Luma
- Widget Title \***: Instagram Pro Widget
- Assign to Store Views \***: A list with 'All Store Views', 'Main Website', 'Main Website Store', and 'Default Store View' (highlighted in blue).
- Sort Order:** 1 (with a note: 'Sort Order of widget instances in the same container')

The 'Layout Updates' section contains a table for configuration:

Page	Container	Template
CMS Home Page	Main Content Top	Instagram Feed Template

Below the table is an 'Add Layout Update' button. The 'Display on' dropdown is set to 'Specified Page'.

In the 'Storefront Properties' tab, set up the Widget Title, assign Store Views, and choose the display configuration you need in the 'Layout Update' block. In the 'Widget Options' tab, choose the options that work best for you.

**Widget Options** ✎

### Widget Options

**Is Enabled \*** Yes ▼

**Mode \*** By User Name ▼

**User Name \***   
Example: http://instagram.com/neklo\_llc

**Title**   
Example: Instagram Feed #%s  
%s - replaces by hashtag

**Description**

**Open post detail in \*** Lightbox ▼  
Open media on Instagram page, in Lightbox on store page on do not open them at all.

**Show Details \*** No ▼  
Show user and post details

**Widget type \*** Grid ▼  
Type of widget display

**Columns \*** 1 ▼  
Number of columns in widget

**Rows \*** 1 ▼  
Maximum number of rows in widget

In the 'Mode' box, choose how you want to get posts from Instagram:

- By User Name;
- By Hashtag;
- By Product Hashtag;
- By Category Hashtag.

Choose the Widget type (grid or slider). If you need to configure your widget in more detail, choose the 'Yes' option in the 'Show Details' box.
