Firefox user notice:

Please use different web browser to view this document.

Sorry for the inconvenience.

Magento 2 Rich Banner Slider is designed for a flawless management of rotating banner sliders. Store admins can create in-page and widescreen banners with configurable images, URL's, animations, timing, and other parameters. Banners can be put on particular pages and page sections. The performance of each banner can be evaluated by viewing key banner stats in the individual grid.

Compatibility: Magento Open Source 2.2.X,
Magento Commerce 2.2.X

[Product Page](#)

Thank you for choosing Aheadworks!

Installing Rich Banner Slider

Command Line Installation

1. Backup your web directory and store database;

2. Download the Rich Banner Slider installation package;

3. Upload the contents of the Rich Banner Slider installation package to your store root directory;

4. Navigate to your store root folder in the SSH console of your server:

```
cd  
path_to_the_store_root_  
folder
```

run the following command:

```
php -f bin/magento  
module:enable  
Aheadworks_Rbslider
```

then:

```
php -f bin/magento  
setup:upgrade
```

after:

```
php -f bin/magento  
setup:static-content:de  
ploy
```

5. Flush the store cache; log out from the backend and log in again.

Make sure the installation is done from under the FTP administrator account. Otherwise make sure to set 775 permissions to the store root directory after the extension is deployed.

Composer Installation

1. Log in to your customer account at <https://ecommerce.aheadworks.com> and navigate to Account -> Composer access;

2. Configure your store to work with the Aheadworks composer repository:

Add composer repository to composer.json by running:

```
composer config repositories.aheadworks composer https://dist.aheadworks.com/
```

in the Magento installation root.

Use the provided key pair as a login and pass. You can optionally save them to the global composer auth file.

3. You can start using AW composer now.

For extension names, navigate to Account -> Composer access.

4. Open the root Magento directory on your server and send Composer the following command:

```
composer require <component-name>:<version>
```

Note: Use the previously copied component name and version.

5. Make sure that Composer finished the installation without errors. Flush the store cache, log out and log into the backend again.

Introducing Rich Banner Slider

Rich Banner Slider extension introduces advertising banner rotation to the Magento 2 stores:

- Multiple Slides available for Banner composition;
- Adjustable Banner and Slide look;
- Customer group targeting.

Extension Logic

The module allows adding banner slides (or simply banners) to home, product, catalog, blog pages, or within a custom Magento widget. Each banner can contain several slides and target a particular customer group. Thanks to the flexible product attributes and conditions, store admins can place banners on a required set of pages. Additionally, the extension provides click-through rate (CTR) statistics per slider for evaluating the promotional campaign's efficiency.

Getting Around

Rich Banner Slider introduces its sections under Content > Rich Banner Slider by Aheadworks. The extension comes with three sections:

- Slides - allows store administrator create and manage slides;
 - Banners - allows store administrator create and manage banners;
 - Statistics - provides an overview of the banner and slides performance.
-

Managing Sliders

As it has been mentioned in the first chapter Banners consist of the Slides, - a base units of a banner slider.

To create a banner, store administrator should first create a required number of Slides. Each Slide can have a unique background image, destination URL and can be assigned to a number of different Banners.

Slides

The slides can be created and managed from under the Content > Rich Banner Slider by Aheadworks > Slides section.

Display From

Display To

This screen allows store administrator to name the Slide, define customer and store view conditions and allows for the slide scheduling. The following settings are available:

- Name - defines the name of the Slide for internal identification purposes;
- Assign to Banner(s) - allows assigning the Slide to a particular banner upon saving;
- Enable Slide - allows enabling/disabling the Slide;
- Store View - defines store views the Slide will be displayed at;
- Customer Groups - defines the customer groups the Slide will be displayed for;
- Display From/to - allows Slide scheduling.

URL Options ⌵

URL

Open URL in New Window Yes

Add 'No follow' to URL Yes

The 'Image' section allows defining the Slide's image and related options.

- Image Type - allows uploading an image file or defining image URL;
- Image Title - allows defining image title for description purposes;
- Image Alt - allows defining the text to display upon mouse hover.

The 'URL Options' section defines the image destination URL and related options.

- URL - allows defining a destination URL;
- Open URL in New Window - defines if the destination URL should be opened in a new browser window;
- Add 'No follow' to URL - defines if `rel="nofollow"` should be added to the destination URL.

Once done setting up a Slide store administrator clicks Save. After a required set of Slides created, store administrator can proceed to creating a Banner.

<input checked="" type="checkbox"/>	ID ↑	Thumbnail	Name	Status	Assigned to Banners	Customer Groups	Store view	Display From	Display To	Position
<input type="checkbox"/>	From To						All Store Views	From To	From To	From To
<input checked="" type="checkbox"/>	12		Banner slide #3	Enabled	Women>Tops category banner, Women>Tops product page banner	NOT LOGGED IN, General, Wholesale, Retailer	All Store Views			2
<input checked="" type="checkbox"/>	11		Banner slide #2	Enabled	Women>Tops category banner, Homepage banner	NOT LOGGED IN, General, Wholesale, Retailer	All Store Views			3
<input checked="" type="checkbox"/>	10		Banner slide #1	Enabled	Women>Tops category banner, Blog Page Banner	NOT LOGGED IN, General, Wholesale, Retailer	All Store Views			1

Here store administrator is suggested specifying Slides that will be in the Banner.

Statistics

Once the banners are set up, you can estimate the performance of each single one. At the Content > Rich Banner Slider by Aheadworks > Statistics section, you can find every slider's performance stats, including the Click Through Rate (Loads/Clicks=CTR).

Statistics 🔍 admin ▾

Statistics ▾

🔿 Filters |
 👁 Default View ▾ |
 ⚙ Columns ▾

 >

<input type="checkbox"/>	Thumbnail	Slide	Banner	Slider Loadings	Clicks	CTR
<input type="checkbox"/>		Banner slide #1	Women>Tops category banner	10672	175	2%
<input type="checkbox"/>		Banner slide #2	Women>Tops category banner	10673	191	2%
<input type="checkbox"/>		Banner slide #3	Women>Tops category banner	10673	174	2%
<input type="checkbox"/>		Banner slide #3	Women>Tops product page banner	588	6	1%
<input type="checkbox"/>		Fitness sale Widescreen Banner	Homepage widescreen banner	1	0	0%

Here you can filter the existing slides by the banner they are assigned to, define the target clicks, loads, CTR, or find a particular slide by its name.

This section allows identifying the promotional offers customers are interested in and adjusting the marketing policy accordingly.

Banners on the Storefront

On the storefront, the pre-configured banner sliders are loaded together with the rest content of the page. This way, it becomes visible to visitors upon the page load.

So, here's how an in-page banner slider looks like:

Tops
