Extension page: http://ecommerce.aheadworks.com/magento-extensions/social-media-bundle.html

It goes without saying that social networks are an effective tool to increase the quantity of store customers. They can be used to announce promotions or discounts and spread this news within social communities. The Social Media Bundle extension delivers all features of Twitter, Facebook and Google+ with one installation.

Installation

1. Backup your web directory and store database.

˅ Click to view details

You can make backup copies with any tool you find appropriate

If you are going to use the native Magento backup function, navigate to System -> Tools -> Backups and perform System and Database backups

2. Log in to the Magento backend

3. Disable compilation

˅ Click to view details

Navigate to System -> Tools -> Compilation.

If Compiler status is Disabled, you can skip to the next step

If Compiler is enabled, disable it.

IMPORTANT: after the extension is installed, you can enable the compilation again; IT IS CRUCIAL that you use " Run Compilation Process" function, not just "Enable button"

⚠ Installing an extension with the Compilation enabled will result in store downtime.
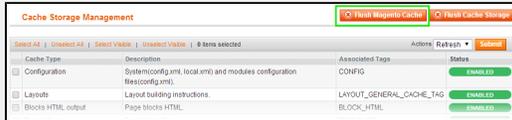

4. Flush store cache
   ˅ Click to view details

   You can flush the store cache in 2 ways:

   - via the backend:

   Navigate to System -> Cache Management menu, and click Flush Magento Cache button

Cache Storage Management			⊗ Flush Magento Cache	☆ Flush Cache Storage
Select All	Unselect All	Select Visible	Unselect Visible	0 items selected	Actions: Refresh ▾	Submit
	Cache Type	Description	Associated Tags	Status
☐	Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
☐	Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
☐	Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED

   - via filesystem:

   On your server, navigate to Magento root folder, then proceed to /var/cache/; delete all the content there.

5. Download the extension package from your account and extract the downloaded archive

6. Copy the content of /Step_1/ folder to your store's root directory

   ✔ If you are using a custom theme,
     ˅ read the instructions here.

       In case you are using a custom theme, it is recommended to copy the design files to your current theme's folders. In case there are several themes in use at the same store, the design files must be copied to each of them.

       - Find this folder in the package: /step_1/app/design/frontend/base/default/ ; copy its content to /app/design/frontend/[your_package]/[your_theme]/
       - Find this folder in the package: /step_1/skin/frontend/base/default/ ; copy its content to /skin/frontend/[your_package]/[your_theme]/

7. Copy the content of /Step_2/ folder to your store's root directory

Description

Social Media Bundle represents a set of the extensions responsible for particular social network integration.

It does not have any settings on it's own. All the included extensions settings can be found in the corresponding backend sections under System > Configuration > AheadWorks extensions.

Social Media Bundle introduces the following social integration extensions to the store:

- Facebook Link;
- Twitter Integration;
- Google Integration;
- Pin Button (Pin Button extension is not distributed independently).

Please refer to the corresponding product pages for more information on the extensions included.

Documentation

As stated in the section above Social Media Bundle - is a set of the extensions representing corresponding social networks.

Documentation for every extension can be found under Docs & Articles tab at the extension pages at AheadWorks store.

- Facebook Link readme;
- Twitter Integration readme;
- Google Integration readme;
- Pin Button readme.
